

AFCNET

November 8, 2018

AFCNET has made some updates to their website which requires a change to the URL stored in ClientBase. For agencies with ClientBase for Windows, go to Utilities, Live Connect Providers. Find and modify AFCNET and change the URL to the below. **Note:** just remove the “.php” from the end: <https://www.afcnet.com/login>

For agencies with ClientBase Online *only*, go to the screwdriver/wrench icon in the upper right and chose Settings. Find and select Live Connect Providers, and then modify the entry for AFCNET.
