

Polar Online

09/23/16

In ClientBase versions 4.0.00, Polar Online is not working when using Live Connect from the Res Card screen that uses the new multi-tab Live Connect feature.

In ClientBase for Windows, add a new Res Card, input Princess Cruise Line as the vendor and use the Live Connect button near the top of the window.

For ClientBase Online, make sure to include the Vendor Name before selecting Polar as the provider.
