Sabre's goal is to match its customers with competent companies that have a proven history they can work with our products. While Trams Back Office and ClientBase customers have had success in working with these companies, Sabre does not own or control the companies and organizations listed. Therefore, by using these companies, our customers understand, acknowledge and accept that Sabre cannot be held liable or responsible for any adverse event that takes place with the companies listed. Choosing a company or organization is strictly voluntary and done so at the sole risk of the customer.

AssetHR

Oryel Payroll + is now AssetHR Payroll +. AssetHR is a leading provider of the industry's most robust and sophisticated web-based HR technology solutions. AssetHR Payroll+ is a web-based payroll solution that fully integrates with the Trams financial package, providing a smarter, more straightforward, and more malleable system than other outsourced offerings or installed off-the-shelf packages. Payroll+ is also distinctive in that, as a web-based application, it allows Trams affiliates to easily and securely complete payroll transactions from anywhere at any time.

Caledon Card Services

Caledon Card Services has a rich 30 year history of servicing the travel industry for such clients as American Airlines, Delta, and US Airways as well as large U.S. and Canadian based travel agencies with coverage being extended to the European and Asia Pacific regions. They specialize in eCommerce, custom internet gateway solutions, enhanced level 2/3 and travel/flight addendum data as well as UATP transactions. Caledon's main advantage is that while they can offer a full merchant services solution, they can also be used as a neutral payment gateway allowing merchants to maintain current Acquiring Bank relationships.

PerisKope is a cost-effective, intuitive, web-based travel reporting system built on the Microsoft.NET platform. The unique dashboard home page provides near real time spend and transaction comparisons for air, hotel and data based on user selected date parameters. The sum data can be *clicked thru* to one or more levels of detail.

Access to dozens of reports is security driven and contains customer, agent or agency management summary and detail reports. Since travel agencies are permitted unlimited licenses; your agency can provide all your clients with this critical decision support tool while reducing your internal MIS costs. Agency owners and key managers can also access their own unique set of financial reports incorporating transaction fees and commissions.

Products:

- Web-based travel reporting system built on the Microsoft .NET platform. The unique dashboard provides near real-time transaction comparisons for air, hotel and data based on user selected date parameters. The summary can be drilled down for further detail.
