Active ResCard Dashboard Report

This report can be run for the agency or for each agent.

Active ResCard Graph – Number of all active rescards where the client profile is active.

Pie Chart for Active Rescards – Displays percentage of active rescards that contain one or more reservations. Around the chart is the count of active reservations with or without reservations and a count of no open reminders. For active rescards with reservations, the average days to close is shown. For active rescards without reservations, the date of the oldest created rescard is shown.
