

ODBC Setup – Interbase ODBC Driver (Embarcadero)

Copy your Database Path:

1. Go to Start/Programs/Trams and click on Alias Utility
2. Modify the Alias entry for the database you wish to run reports on. This will most likely be named TRAMS.
3. Highlight the path. Press Ctrl C to copy the path and close the Alias Utility.

For Windows 32 bit:

Go to Start/Control Panel. Confirm upper right option is set to Large or Small Icons. Open Administrative Tools, and then open Data Sources (ODBC).

For Windows 64 bit:

Go to C:\Windows\SysWOW64. Scroll down and double click on odbcad32.exe. This launches the 32 bit version of the ODBC Administrator, which is what must be used.

Continue with setup (example screen shot below):

1. Click on the System DSN tab. Select the TRAMS ODBC Datasource and click on Configure.
2. ****Note:** If you do not see the TRAMS ODBC Datasource, click Add. Select the Interbase ODBC driver and click Finish. Enter TRAMS ODBC Datasource beneath “Data Source Name (DSN):” and continue with the Configure steps**
3. Right mouse click in the field beneath “Database” and choose Paste. This should paste the path you copied from the Alias Utility.
4. Enter user login name under “Database Account” and your password where designated.
5. Enter TRAMS_USER under “Role.”
6. Change the Dialect from 3 to 1.
7. Click on Test Connection to confirm “Connection Successful” response is received.
8. Click OK to save the settings
9. Close the ODBC Datasource Administrator window by clicking Okay.

Download Trams Back Office TCR Reports

1. Go to <http://static.trams.com/tramslibrary/reports/tbotcr.html>
2. To download the report, select the report you wish to download. The report can be saved anywhere on your hard drive, but we recommend the following location:

C:\Users\Public\Documents\TRAMS\TCR Reports

Download ClientBase for Windows TCR Reports

1. Go to <http://static.trams.com/tramslibrary/reports/cbreports/tcrCb.html>
2. To download the report, select the report you wish to download. The report can be saved anywhere on your hard drive, but we recommend the following location:

C:\Users\Public\Documents\TRAMS\TCR Reports

InterBase ODBC Setup [X]
