

Live Connect Activity - Live Connect Providers (Booking Engines), Suppliers and Travel Consultants Using Live Connect (LC).

Provides an analysis of all transactions booked for all suppliers and booking engines available via Live Connect.

It reviews all Reservations during the selected period, and reports out all those that could have been booked using Live Connect Provider booking engines setup to run in ClientBase.

It provides a

1. Total of all the applicable reservations,
2. How many of those were imported using Live Connect and
3. How many of those were actually booked during the Live Connect Process.

You can sort the report to show one group within another.

The options for sorting and displaying are:

1. Travel Consultants within Suppliers
2. Suppliers within Travel Consultants
3. Booking Engines within Travel Consultants
4. Travel Consultants within Booking Engines
5. Booking Engines within Suppliers
6. Suppliers within Booking Engines

Note: New Feature that works only with Datalink

There are four Parameters in "Blue Buttons". You can click on anyone of them and change the value and the report will refresh to reflect your selected change. There are two buttons for the dates, one to suppress the instructions and one to select the Sort and Display options. The Sort Option, located just below the Report Title Line, will probably be the most helpful.
