

Agent 100% Commission Exception Report-

This report is an exception report that will show any Invoice Booking Records where the commission being paid to an agent or agents exceeds the commission entered in the "Commission/Rate" Field on the General Info Tab. When the commission being paid out to the agents in the booking exceeds 100%, then all bookings meeting that criteria will be displayed on the Exception Report. You would then need to go to the applicable bookings and make any appropriate changes to reduce the commission paid to less than 100.
