

## Airline Activity Report with Mileage

This report is an Airline Mileage Report. Report reads only Travel Types with Travel Category AIR as defined under Utilities>Setup>Travel Types in TRAMS Back Office. It displays City Pairs by Airlines and shows the Mileage for each Airline. Both "Total Mileage" and "Average Cost Per Mile" are shown. If no City Pair information is present in the Segment Tab of the booking, that City Pair and booking is ignored and will not be displayed on the report. Exchanged tickets will show the "Original" ticket as "Exchanged" and will not use the "Original" City Pairs in the calculations. The "Exchanged" ticket will be displayed fully and will be part of the calculations. Refunded tickets will show as "Refunded" and will not use the City Pairs in the calculations. As a "QC" function, the report can be run to show all City Pairs where no Segments are present.

**Revised 11/18/2011 to allow selection of client information and added parameter to exclude all exchanges.**

**Revised 1/22/2013 to reflect current logic used for excluding refunds and exchanges from report. Will only look at airport city codes, not rail city in order to show proper location.**
