

Client Rail Segment/Class Of Service With Mileage

This report breaks down rail segments by segment pair or by class of service code. It reads only Travel Types with Travel Category RAIL as defined under Utilities>Setup>Travel Types in TRAMS Back Office. The report breaks down by Count, Segment Fare and Mileage based on number of bookings.

This report will read the city name that matches the three letter code with the city type Train Station as defined under Utilities>Setup>City Codes in TRAMS Back Office. Inclusion of the proper three letter code for city type Train Station is required in order for the proper city name to appear on the report.

If the three letter code does not have a matching city type Train Station, the same three letter code will print for the city name.

Parameters for report:

Select Report Type, either Client Rail(S)egments or (C)lass Of Service.

Select Client Breakdown by (A)ll Clients, (C)lient Interface ID, Client (G)roup, or (I)nvoice Group.
