

Pegasus II Export-

This export file is used by an agency when enrolled in the Pegasus Hotel Commission Reconciliation Program. The Crystal Export would be run for the appropriate period for Comm Track Hotel bookings. After saving the exported file, it should be forwarded to Pegasus for processing on their end. Pegasus will then provide participants with their reconciled transaction data in a file that can be imported by TRAMS Back Office using Type of Pegasus II. Reconciliation of this returned file will close the Hotel bookings in TRAMS Back Office.

Please check the TRAMS Back Office "Help" files for how to sign up for and participate in this program.
