

## User Production Report

The report produces a productivity measurement summary report using the CHANGELOG table information. It includes additions and changes to bookings, invoices and payments by log-in user based on a date range. The default is to run the report for all log in users but can be run by a single log in user.

The screenshot shows a dialog box titled "Enter Parameter Values" with a close button (X) in the top right corner. Inside the dialog, there is a section labeled "Parameter Fields:" with a "Reset" button to its right. Below this is a list box containing three items: "DateFrom", "DateTo", and "UserID", with "UserID" selected and highlighted in blue. Below the list box is a text input field labeled "Input User Name or \* for ALL:". At the bottom of the dialog, there is a "Discrete Value" label and a dropdown menu currently showing "\* - Leave \* for All User Names". At the very bottom of the dialog are three buttons: "OK", "Cancel", and "Help".

Parameters for report:

**Date From:** Date to start report. The date is based upon those entries obtained from the CHANGELOG table.

**Date To:** Date to end report. The date is based upon those entries obtained from the CHANGELOG table.

**UserID:** Default is the report runs for all log in users. Inputting a user will run the report by the single log in user only
