

Client Trips by Regions - Variable # of Clients

Instructions

When Using Datalink, you can Click on any BLUE Box to change that Parameter

List of Leisure Customers, ranked by highest volume of business with any or all Travel Categories -
Air, Hotels, Cars, Tours, Cruises, Rail, Transportation, Fees and Insurance.

Summarized by Regions identified in the ResCard.

NOTE: If there is no Region in the ResCard, it will drop into the last column of the report (No Region Assigned).

Based on Res Card Date, Reservation Date or Trip Start Date for all or one Vendor (Supplier)

Uses data only within Res Cards for this report.

Selection Criteria

Date in Res Card to Be Used - Select Options

Res Card Create Date (Inquiry Date)

Res Card Start Date (Travel Date)

Reservation Date (Booking Date)

Range of dates to be used (Select one)

Select as many Travel Categories as you wish to include.

Select 'All' or one Vendor (Supplier).

If you are using DataLink, you can change the number of Clients you wish to view. If you are using TCR10, do not change from the 100 quantity default. Recommend that you set this viewing option to 30000 when using a value other than "All" for Supplier. The value of this viewing quantity still relates to "All". Otherwise, if your selections are not within the viewing quantity, they will not be included in the displayed report

Suggestion: Select a Supplier and see how many and which of your clients repeat with that Supplier.

You can drill down on any client and see all the transactions that make up the total for that client.
